

FIRE SAFETY

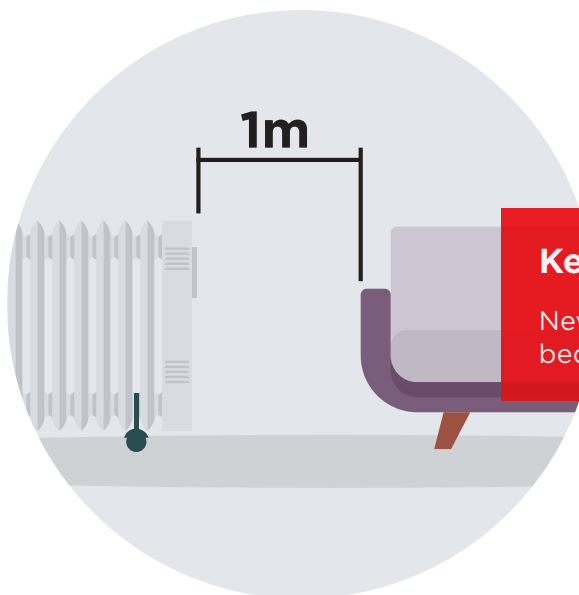

Working smoke alarms help save lives:

You must have at least one working smoke alarm on each level of the home placed between bedrooms and living areas. Check your alarm works every month.

Get out. Stay out. Call Triple Zero (000)

If there is a fire in the home, know your escape plan and use it. Never go back inside a burning building.

Keep everything one metre from the heater.

Never place clothes on a heater to dry and always keep bedding and blankets at least one metre away

Outdoor LPG cooking stoves belong outside.

Never use LPG cooking stoves inside or in confined spaces. This is a health and fire hazard

If you have any further questions or would like a FREE Safety Visit in your home, please scan the QR code and complete the booking form.
